

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims

Claim 1 (Currently amended): An image extracting method of extracting a ~~predetermined number of~~ images from a plurality of images, comprising:
a setting step of setting a number of images to be extracted from the plurality of images according to a user operation;
~~an input~~ a recognition step of ~~inputting~~ recognizing evaluations for the plurality of images, the evaluations being set by a user; and
an extraction step of extracting the ~~predetermined set~~ number of the images from the plurality of images based on the ~~input~~ recognized evaluations.

Claim 2 (Currently amended): An image extracting method according to claim 1 ~~+~~ 15, wherein said input step comprises sequentially inputting the evaluations for respective ones of the plurality of images.

Claim 3 (Original): An image extracting method according to claim 2, wherein the evaluations are input in chronological order.

Claim 4 (Currently amended): An image extracting method according to claim 1 ~~+~~ 15, wherein said input step comprises inputting an instruction for image correction processing including an image correction, in addition to inputting the evaluations.

Claim 5 (Original): An image extracting method according to claim 1, further comprising an album creation step of creating a photo album by arranging the extracted images on each page of the photo album.

Claim 6 (Currently amended): An image extracting method according to claim 5, wherein said album creation step comprises arranging the extracted images on each page of the photo album based on the ~~input~~ recognized evaluations.

Claim 7 (Currently amended): An image extracting method according to claim 1, further comprising a division step of dividing the plurality of images into a plurality of groups, and

wherein said extraction step comprises extracting at least one image from the images belonging to each of the groups into which the plurality of images are divided and executing the extraction of the images until ~~the predetermined number of images is reached~~ a number of images extracted from all the groups reaches to the set number.

Claim 8 (Original): An image extracting method according to claim 7, wherein said division step comprises designating a group to which each of the plurality of images is to belong and carrying out the division according to the designated group.

Claim 9 (Original): An image extracting method according to claim 7, wherein said division step comprises dividing the images according to times of creation of the images.

Claim 10 (Original): An image extracting method according to claim 7, further comprising an extraction number input step of inputting a number of images to be extracted from each of the groups into which the plurality of images is divided.

Claim 11 (Original): An image extracting method according to claim 7, further comprising an album creation step of creating a photo album by arranging images extracted from each of the groups into which the plurality of images is divided on each page of the photo album.

Claim 12 (Currently amended): An image extracting method according to claim 11, wherein said album creation step comprises arranging the extracted images from each of the groups into which the plurality of images is divided on each page of the photo album based on the ~~input~~ recognized evaluations.

Claim 13 (Original): An image extracting method according to claim 11, wherein said album creation step comprises arranging the extracted images from the groups into which the plurality of images are divided on pages of the photo album based on the groups into which the plurality of images are divided.

Claim 14 (Currently amended): An image extracting method according to claim 14 ~~15~~, wherein said input step further comprises inputting an initial evaluation value intermediate between a highest evaluation value and a lowest evaluation value.

Claim 15 (Currently amended): An image extracting method according to claim 1, further comprising an input step of inputting a user's setting of the evaluations for the plurality of images and

wherein said ~~input~~ recognition step comprises ~~inputting~~ recognizing the evaluations ~~set according to operation of an operating element based on the user's setting input in said input step.~~

Claim 16 (Currently amended): An image extracting apparatus that extracts a ~~predetermined number~~ of images from a plurality of images, comprising:

a setting device adapted to set a number of images to be extracted from the plurality of images according to a user operation;

an ~~input~~ a recognition device that ~~inputs~~ adapted to recognize evaluations for the plurality of images, the evaluations being set by a user; and

an extraction device ~~that extracts~~ adapted to extract the ~~predetermined set~~ number of ~~the~~ images from the plurality of images based on the ~~input~~ recognized evaluations.

Claim 17 (Currently amended): A computer-readable storage medium storing a program for causing a computer to execute an image extracting method of extracting a ~~predetermined number of~~ images from a plurality of images, the ~~program~~ image extracting method comprising:

a setting step of setting a number of images to be extracted from the plurality of images according to a user operation;

a ~~module for inputting~~ recognition step of recognizing evaluations for the plurality of images, the evaluations being set by a user; and

a ~~module for~~ an extraction step of extracting the ~~predetermined set~~ number of ~~the~~ images from the plurality of images based on the ~~input~~ recognized evaluations.

Claim 18 (Currently amended): An image extracting method of extracting a ~~predetermined number of~~ images from a plurality of images, comprising:

~~a recognition step of recognizing evaluations set for the plurality of images;~~

~~a division step of dividing the plurality of images into a plurality of groups; and~~

~~an extraction step of extracting the predetermined number of images by extracting at least one image from images belonging to each of the groups.~~

a setting step of setting a number of images to be extracted from the plurality of images;

a recognition step of recognizing evaluations for the plurality of images, the evaluations being set by a user; and

an extracting step of extracting the set number of the images from the plurality of images in descending order of the recognized evaluations.

Claim 19 (Currently amended): An image extracting apparatus that extracts a ~~predetermined number of~~ images from a plurality of images, comprising:

- ~~a recognition device that recognizes evaluation values set for the plurality of images;~~
- ~~a division device that divides the plurality of images into a plurality of groups; and~~
- ~~an extraction device that extracts the predetermined number of images by extracting at least one image from images belonging to each of the groups.~~

a setting device adapted to set a number of images to be extracted from the plurality of images;

a recognition device adapted to recognize evaluations for the plurality of images, the evaluations being set by a user; and

an extracting device adapted to extract the set number of the images from the plurality of images in descending order of the recognized evaluations.

Claim 20 (Currently amended): A computer-readable storage medium storing a program for causing a computer to execute an image extracting method of extracting a ~~predetermined number of~~ images from a plurality of images, the ~~program~~ image extracting method comprising:

- ~~a module for recognizing evaluation values set for the plurality of images;~~
- ~~a module for dividing the plurality of images into a plurality of groups; and~~
- ~~an extraction module for extracting the predetermined number of images by extracting at least one image from images belonging to each of the groups.~~

a setting step of setting a number of images to be extracted from the plurality of images;

a recognition step of recognizing evaluations for the plurality of images, the evaluations being set by a user; and

an extracting step of extracting the set number of the images from the plurality of images in descending order of the recognized evaluations.

Claim 21 (New): An image extracting method according to claim 1, wherein said extracting step comprises eliminating an image, the recognized evaluation of which is lower than a specific evaluation, from extracting, even where the total number of the extracted images does not reach to the set number.
